# BUISNESS PERFORMANCE SUMMARY

The Sales Performance Analysis dashboard was developed using Microsoft Power BI to evaluate business performance across multiple dimensions, including revenue, quantity sold, product categories, customer segments, payment methods, countries, sales zones, shipping modes, and monthly sales trends.

The dashboard reports total revenue of 1.04 million, approximately 55,000 units sold, around 1,000 orders, and average revenue per invoice of 1.04K. The analysis highlights Office Supplies as the leading revenue-generating category and the East zone as the strongest-performing sales region. Consumer customers contribute the largest reported share of revenue, while credit cards and checks are the most commonly reported payment methods by revenue share.

Monthly revenue peaks in June, August, and September, providing useful insights for sales planning and forecasting. Storage, Art, and Binders are the leading sub-categories by quantity sold, while Economy is the most frequently used shipping mode by quantity.

Overall, the dashboard provides a clear overview of sales performance, identifies key revenue contributors, and highlights opportunities to improve inventory management, customer engagement, regional sales strategies, and operational efficiency. These findings can support informed, data-driven business decisions and help identify areas for future growth.

# KEY INSIGHTS AND RECOMENDATIONS

## KEY INSIGHTS

- **Category Performance:** Office Supplies leads revenue with 0.68 million, followed by Furniture at 0.19 million and Technology at 0.17 million.
- **Customer Segments:** Consumer customers contribute the largest reported revenue share at 55.03%, followed by Corporate at 31.62% and Home Office at 3.36%.
- **Payment Methods:** Credit cards contribute 47.37% of revenue, checks 44.63%, and cash 7.89%.
- **Regional Performance:** The East zone leads with 0.59 million in revenue, followed by the South at 0.25 million and the North at 0.19 million.
- **Country Performance:** France, Germany, and the United Kingdom are the top three revenue-generating countries.
- **Monthly Trends:** Revenue peaks in June, August, and September, indicating periods of stronger sales activity.
- **Product Demand and Shipping:** Storage, Art, and Binders lead by quantity sold. Economy is the most frequently used shipping mode by quantity.

## RECOMMENDED SOLUTIONS

- **Strengthen Product Sales:** Maintain sufficient Office Supplies inventory and explore targeted promotions to improve Furniture and Technology sales.
- **Improve Customer Engagement:** Retain Consumer customers through good service and targeted offers while developing strategies to increase Corporate and Home Office sales.
- **Optimize Payment Options:** Maintain reliable credit card and check payment services and review transaction costs and customer preferences.
- **Develop Regional Strategies:** Analyze the East zone's success and identify opportunities to increase sales in the South and North zones.
- **Plan Using Sales Trends:** Use monthly revenue patterns to improve forecasting, inventory planning, and promotional scheduling.
- **Manage Inventory and Shipping:** Monitor demand for leading sub-categories and evaluate shipping costs, delivery times, and customer preferences.
- **Monitor Performance:** Review dashboard KPIs and interactive filters regularly to identify changes, measure progress, and support data-driven decisions.

## CONCLUSION

The Sales Performance Analysis dashboard provides valuable insights into overall business performance by examining revenue, product categories, customer segments, payment methods, geographical regions, and shipping preferences. The findings identify Office Supplies as the leading revenue-generating category, the East zone as the strongest-performing sales region, and Consumer customers as the largest reported revenue contributor. Monthly revenue trends also highlight opportunities to improve sales forecasting and promotional planning.

By implementing the recommended solutions, the business can strengthen product performance, improve customer engagement, optimize inventory management, and develop more effective regional sales strategies. Regular monitoring of key performance indicators and dashboard visualizations will help identify emerging trends, evaluate business performance, and support timely, data-driven decisions. Overall, this analysis provides a practical foundation for improving operational efficiency, identifying growth opportunities, and supporting sustainable business development.
